

Corporate Social Responsibility

Improving Water Supply for Decentralised Communities

Aquamate are conscious of the positive effect they can have on society, both in Australia and overseas. As a manufacturer of water storage products, Aquamate has chosen to focus on assisting remote and developing communities with the supply of clean, sustainable drinking water infrastructure.

Aims & Objectives

It is Aquamate's objective to:

- be involved in initiatives that improve access to drinking water in remote and developing communities
- provide in-kind support in the form of product and time to deserving projects
- support charitable organisations that objectively improve the sustainability of communities

Responsibilities

To fulfil its corporate social responsibility, Aquamate will:

- actively promote means to conserve water to dealers, agents, staff and customers.
- prioritise the assistance of remote and developing communities to access clean and sustainable water resources
